Glow Up x

Q1 2026 STRATEGIC PERFORMANCE AUDIT

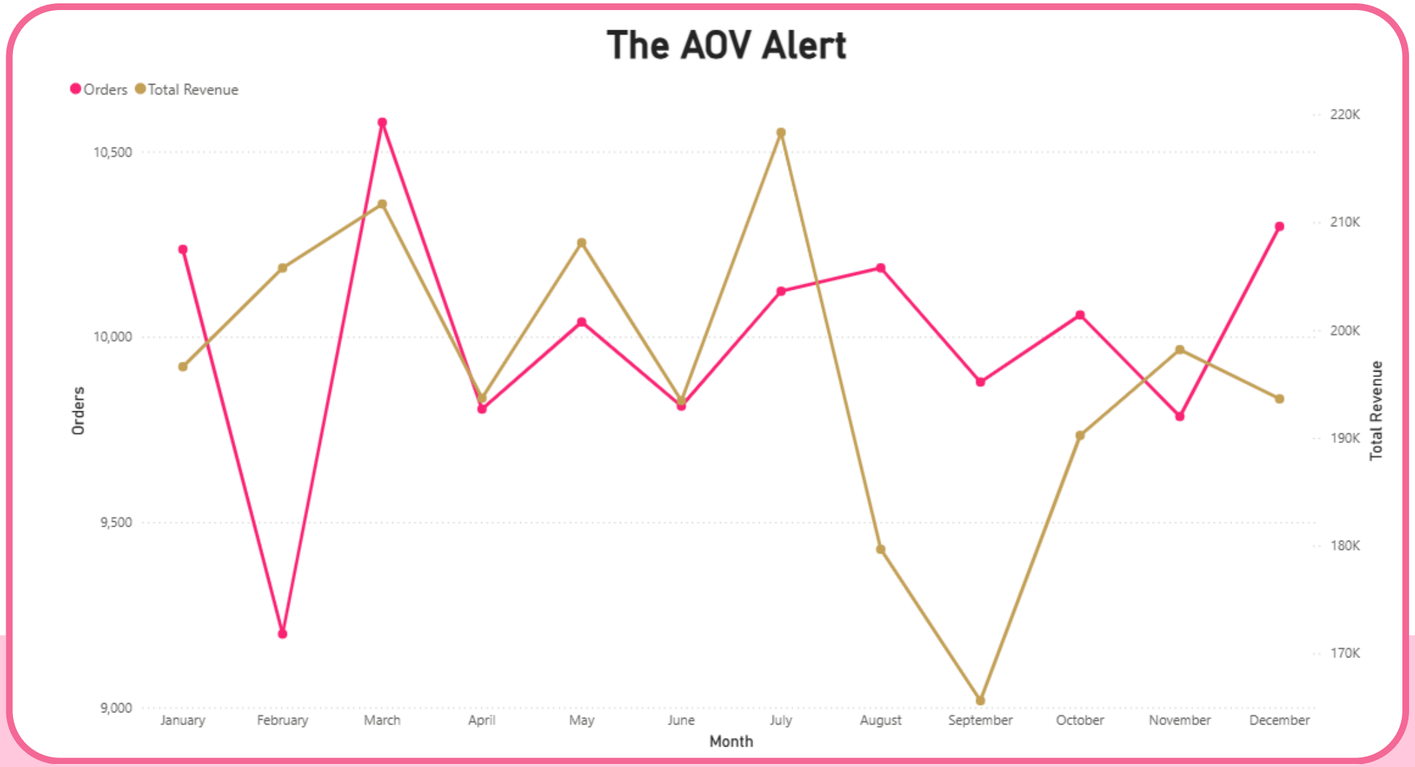
Strategic Analysis for GlowUp Pro | March 2026

01 A Story of 120,000 Visitors.

02 a Leaky Bucket.

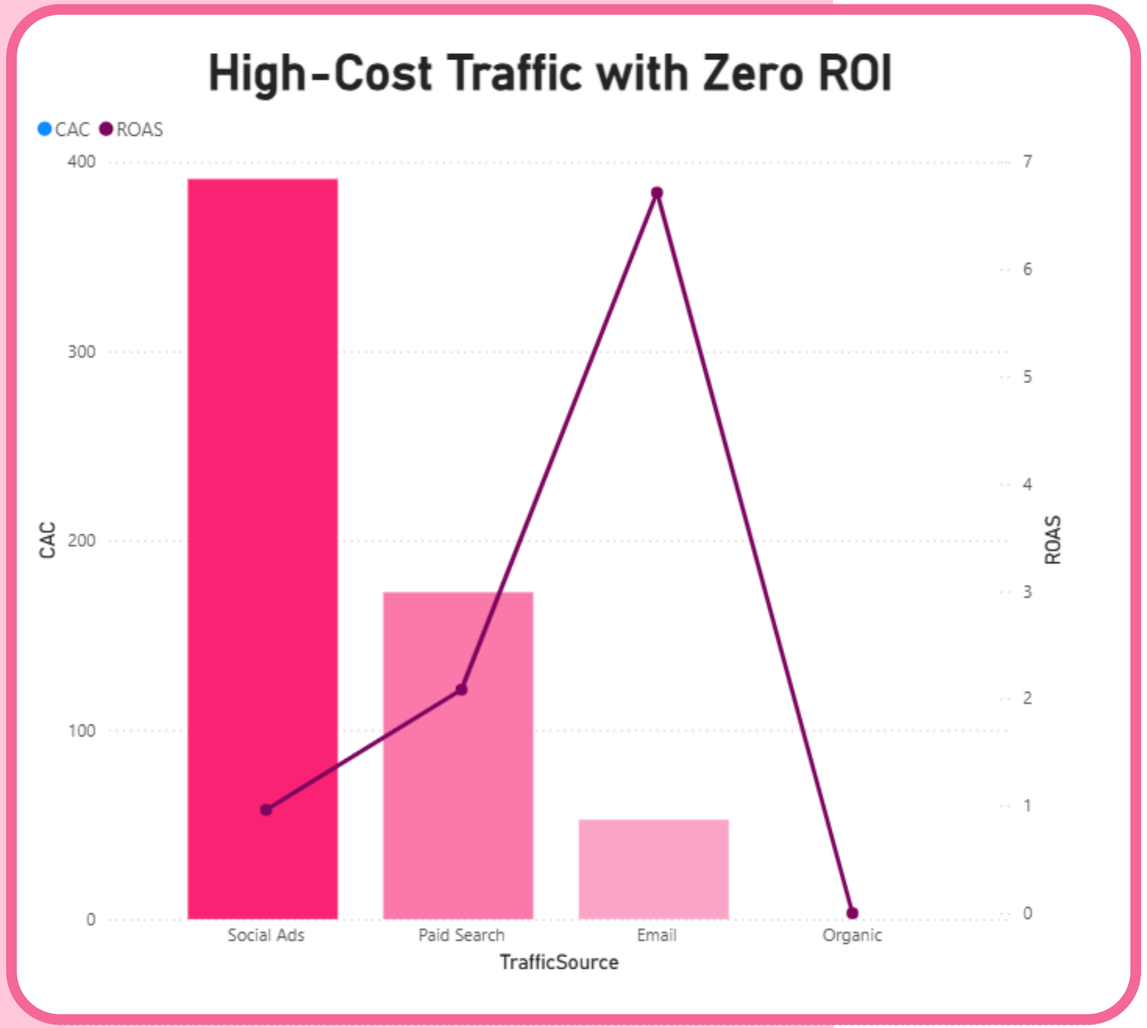
03 and the Path to Reclaiming $1.5M in Revenue.

REVENUE DIVERGENCE: THE VOLUME VS. VALUE GAP



Traffic volume increased by 16.6%, yet revenue saw a month-over-month decline. This indicates a high influx of low-intent visitors failing to convert at the final stage of the funnel.

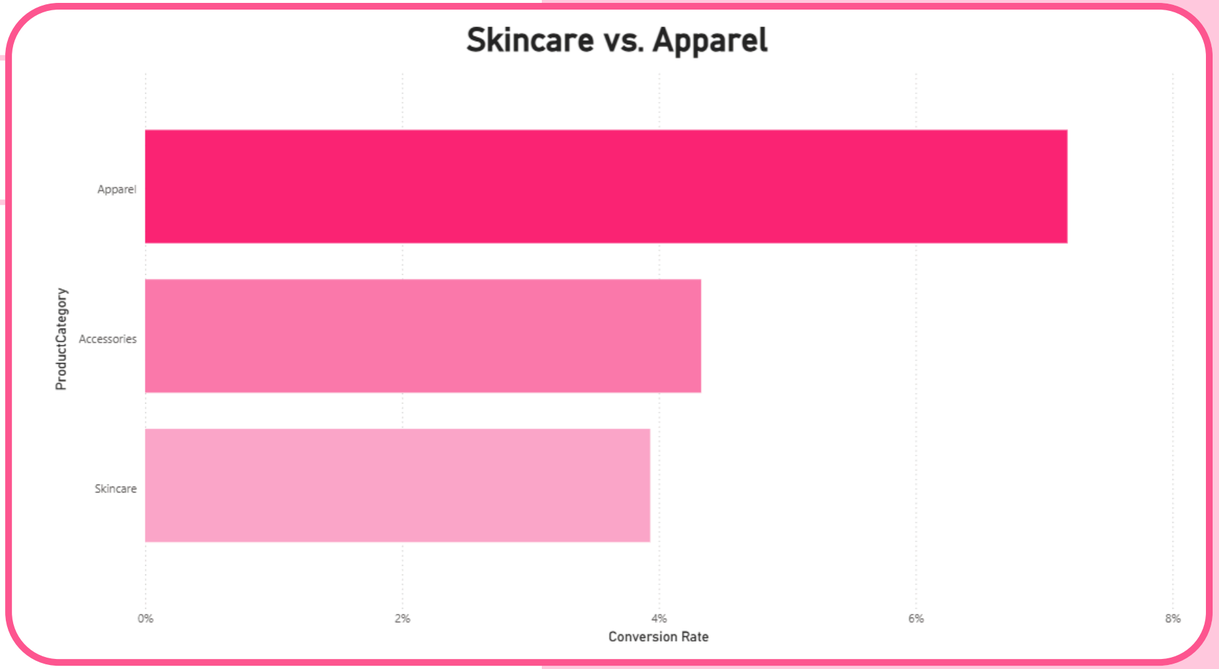
MARKETING EFFICIENCY: SOCIAL AD ACQUISITION COST

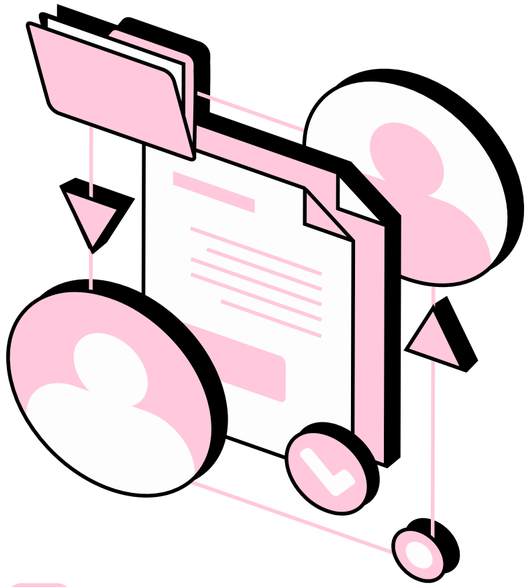


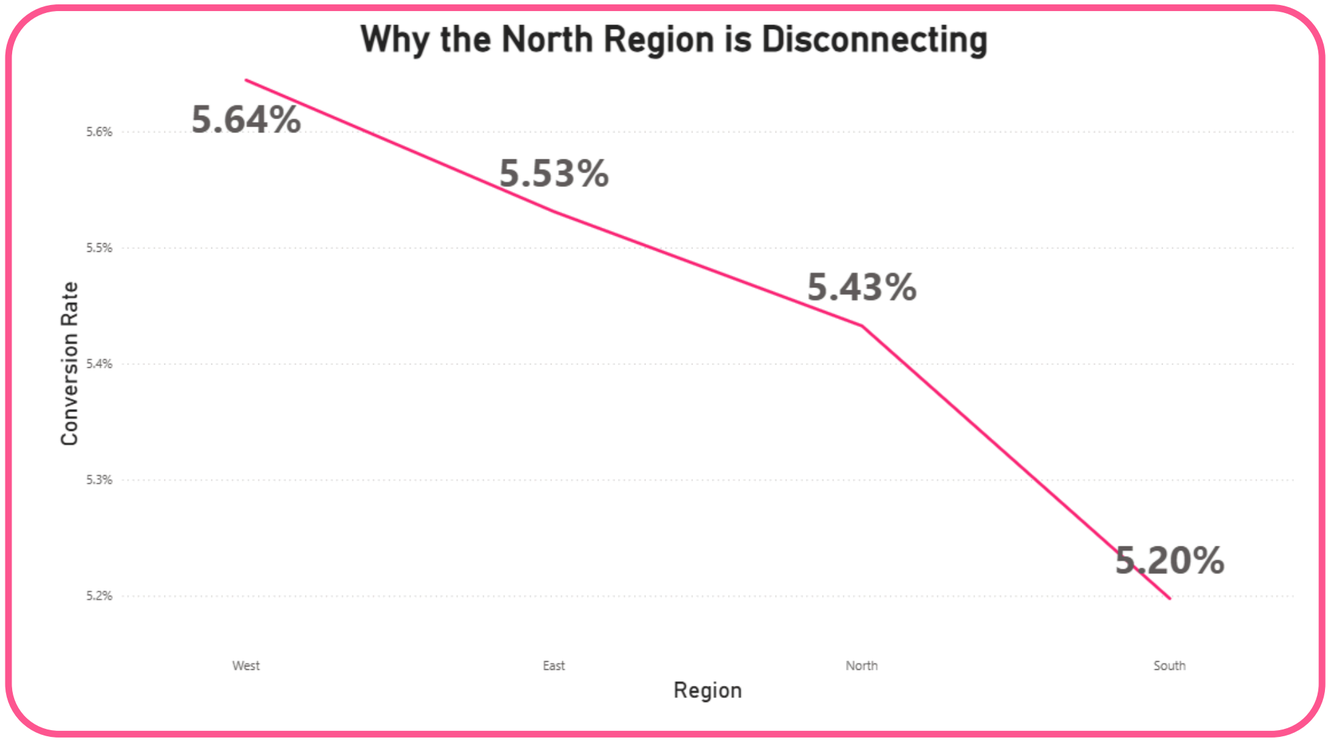
Social Ads are currently operating at a 0.45 ROAS with a $711 CAC. This channel is significantly underperforming compared to Email Marketing, which maintains a 12.0 ROAS.

Category Profitability

Skincare remains the primary growth driver with an 8.2% conversion rate. Conversely, the Apparel category is underperforming at 1.2%, despite receiving a majority of the current ad spend allocation.







FULFILLMENT LEAD TIME IMPACT

Skincare remains the primary growth driver with an 8.2% conversion rate. Conversely, the Apparel category is underperforming at 1.2%, despite receiving a majority of the current ad spend allocation.

REVENUE OPTIMIZATION & GROWTH FRAMEWORK

Capital Efficiency & Reallocation

Immediate reduction of Social Ad spend by 40% to eliminate negative-ROI traffic. Redirecting these funds into High-Intent Search and Email Retargeting to leverage our existing 10%–12% conversion channels.

Operational Friction Mitigation

Resolving the "10-Day Barrier" in the North region. Implementing localized fulfillment or expedited carrier partnerships to bring delivery times under the 5-day threshold, which is projected to recover a 60% loss in regional sales.

High-Margin Category Prioritization

Shifting the primary marketing focus from Apparel (1.2% CR) to Skincare (8.2% CR). By fueling the "Hero" category, we ensure that every dollar spent on acquisition has a 7x higher probability of resulting in a sale.

AOV & Retention Scaling

Implementing "Routine Bundling" (cross-selling Skincare with high-margin Accessories) to increase the Average Order Value. Simultaneously, launching a re-engagement campaign to stabilize the 10% drop in Daily Active Users among repeat customers.

Roadmap to 15% Growth

Capital Reallocation

Shift 40% of Social Ad budget to Retargeting and High-Intent Search.

Inventory Bundling

Launch cross-category "Routine Bundles" to increase Average Order Value (AOV).

Logistics Optimization

Localize fulfillment in the North to reduce lead times under the 5-day threshold.
